You previously selected the following ERP:

Abas ERP

Attribute	Abas ERP
Customization	Customizable Areas: Workflows for manufacturing scheduling and job costing. Real-time dashboards tailored to production managers and supply chain teams. Advanced inventory tracking: Integration with barcode and RFID systems. Industry modules: Production Planning, Multi-Warehouse Management, Field Service Management. Costs: Customization costs range from AUD 5,000–40,000 depending on complexity. Scalability: Flexible for growing businesses with multi-location operations.
Evolution Path	Developed as an ERP solution for mid-sized manufacturers, later enhanced with cloud capabilities, AI, and automation.
Original System Type	ERP System
Security and Compliance	Security: Multi-layered encryption for data in transit and at rest. Role-based permissions to ensure user-specific access control. Compliance: Adheres to Australian cybersecurity standards and ISO 27001. Industry compliance support (e.g., FDA regulations for medical device manufacturers). Cloud Advantage: Secure cloud hosting ensures minimal downtime and disaster recovery options.
